Never Lose a Customer to a Forgotten Service Date

THE PROBLEM

Auto-mechanic workshops lose repeat customers because they have no system for follow-up. Customers forget when their next service is due, and mechanics have no organized way to track vehicles, service history, or send reminders. The result: lost revenue from customers who simply forgot to come back.

WHY IT MATTERS

1. **Automatic Reminders**
   WhatsApp and email alerts sent automatically at 7 days and 3 days before service is due. No manual effort.
2. **Customer Retention**
   Customers come back on time, every time. Proactive reminders build loyalty and trust.
3. **Zero App Download**
   Runs on a clean Airtable interface — no installation, no training headaches, works on any device.
4. **Complete Service History**
   Every vehicle, every service, every date tracked. Full visibility into your customer base.

HOW IT WORKS

1. **Get Your Dashboard**
   Workshop receives a personalized AutoCare dashboard — clean, simple, ready to use.
2. **Register Customers**
   Add customers and their vehicles with service details and mileage.
3. **Automatic Scheduling**
   System calculates next service dates automatically based on service intervals.
4. **Reminders Sent**
   Automated WhatsApp and email reminders go out at 7 days and 3 days before service is due.

AutoCare

Feature Breakdown & Details

FEATURES

Customer Management
Register and manage all customers per business. Contact details, preferences, and history in one place.

Vehicle Registry
Track every vehicle — make, model, year, plate number, mileage, and full service history.

Automated Reminders
WhatsApp + email reminders at 7 days and 3 days before service is due. Powered by Zapier + SyncMate.

Manual Messaging
Send custom messages to individual customers or groups for promotions, seasonal offers, or updates.

Activity Logging
Every automated action logged for transparency — see exactly when reminders were sent and to whom.

Multi-Tenant Architecture
Each workshop sees only their own data. Fully isolated, secure, and private.

Personalized Dashboards
Clean, intuitive interface customized for each business. No clutter, no confusion.

Auto Date Calculation
System automatically calculates next service dates based on service type and interval.

WHO IT'S FOR

- Auto-mechanic workshops looking to retain more customers
- Car service centers wanting automated customer follow-up
- Fleet management companies tracking vehicle maintenance
- Dealership service departments needing organized scheduling

BY THE NUMBERS

2	WhatsApp	Zero
Reminder Types (7-day + 3-day)	Native Integration via SyncMate	App Downloads Required
