Digitize Your BDC Operations — Rates, Receipts, Settlements

THE PROBLEM

Bureau De Change operators run their businesses through WhatsApp messages and phone calls. There's no structured workflow, no audit trail, and customers can't check rates without calling. This leads to settlement delays, errors, and a lack of operational visibility for owners.

WHY IT MATTERS

1. **Public Rate Display**
   Customers check live USD/GBP rates online without calling. Saves time for both parties.
2. **Digital Receipt Upload**
   Customers submit transfer receipts directly through the platform. No more WhatsApp photo chaos.
3. **Structured Workflow**
   Every transaction follows a clear pipeline from receipt upload to final settlement.
4. **Owner Analytics**
   Full dashboard showing operations, volumes, staff performance, and transaction history.

HOW IT WORKS

1. **Set Rates & Accounts**
   BDC owner sets live FX rates and manages domiciliary account listings on the platform.
2. **Customer Self-Service**
   Customer views current rates online (no login needed), picks a dom account, uploads transfer receipt.
3. **Staff Processes**
   Back-office staff receives the receipt, processes through structured workflow pipeline, sends status updates.
4. **Owner Monitors**
   BDC owner monitors everything from an analytics dashboard — volumes, performance, settlements.

BDC System

Feature Breakdown & Details

FEATURES

Public FX Rate Display
Customers view current USD and GBP rates without login. Always up to date, always accessible.

Receipt Upload System
Customers upload transfer receipts (image or PDF) with amount, bank, and phone number.

Domiciliary Account Listing
Shows BDC's dom accounts for customer reference — organized and easy to navigate.

Transaction Workflow Pipeline
Structured pipeline from receipt upload through processing to settlement. Every step tracked.

Staff Assignment & Management
Back-office staff assigned to transactions. Escalation paths and workload management built in.

Status Notifications
Customers receive automatic updates on transaction progress. No more "what's the status?" calls.

Analytics Dashboard
Owner dashboard showing real-time operations, transaction volumes, and performance metrics.

Customer Self-Service
Rate checking and receipt submission without needing to call or WhatsApp. Friction-free.

WHO IT'S FOR

- Bureau De Change operators looking to digitize operations
- BDC back-office staff needing structured transaction processing
- FX customers wanting self-service rate checking and submissions
- BDC owners seeking full operational visibility and analytics

BY THE NUMBERS

Full	Real-Time	Structured
Transaction Audit Trail	Rate Display	Settlement Workflow

PRICING

Custom pricing based on transaction volume. Contact us for a tailored proposal.
