Church-Branded Recurring Giving, Set Up by Churchgoers Themselves

autogiving.ng

THE PROBLEM

Churches lose significant giving income when members travel, relocate, or simply forget. Manual cash collection lacks transparency and creates reconciliation headaches. Sporadic giving makes it nearly impossible to plan budgets with confidence.

WHY IT MATTERS

1. **Giver-Initiated Adoption**
   Members start using Pledged independently — no church-wide rollout or committee approval needed.
2. **Direct Settlement**
   Funds go straight to the church's bank account via Paystack subaccounts. Money never touches Algolog.
3. **Zero Lock-In**
   Members can pause, adjust, or cancel their giving anytime. Complete control stays with the giver.
4. **Predictable Income**
   Converts sporadic, cash-based giving into reliable recurring revenue the church can plan around.
5. **Full Transparency**
   Every transaction is tracked, auditable, and accompanied by digital receipts — no more cash counting.

HOW IT WORKS

1. **Church Signs Up**
   Church admin creates an account and adds bank details for direct settlement via Paystack subaccounts.
2. **Customize Your Page**
   Upload church logo, set brand colors, and create giving categories (Tithes, Offerings, Building Fund, etc.).
3. **Members Give**
   Members visit autogiving.ng/[church-name], select a category, choose one-time or recurring, and pay securely.
4. **Automatic Processing**
   System charges on schedule, sends receipts, and settles funds directly to the church — all automated.

Feature Breakdown & Details

autogiving.ng

FEATURES

Church-Branded Giving Links
Each church gets autogiving.ng/[church-slug] with custom logo, brand colors, and giving categories.

Recurring Giving Automation
Members set amount + frequency (weekly/monthly). Card tokenized, charges run automatically.

One-Time Giving
No account required. Name, email, amount, pay — perfect for first-time givers and visitors.

Direct Paystack Settlement
Funds settle directly to church bank via Paystack subaccounts. Zero intermediary handling.

Member Self-Service Dashboard
View giving history, pause/adjust/cancel subscriptions anytime. Complete member control.

Church Admin Dashboard
Real-time transaction totals, member lists, CSV export, and category management.

Multi-Church Accounts
A single member account can give to multiple churches — perfect for members attending multiple services.

Automated Receipts
Email + SMS receipts on payment, failed payment alerts, and weekly summaries to church admin.

WHO IT'S FOR

- Church administrators looking to modernize giving operations
- Church finance teams needing transparent, auditable records
- Individual churchgoers who want to give consistently, even when absent
- Church leadership seeking predictable income for better budget planning

BY THE NUMBERS
