SkillPay

Payment Infrastructure That Powers Your Platform

skillpay.link

THE PROBLEM

Building payment infrastructure from scratch for each new product is expensive, slow, and error-prone. Nigerian businesses need reliable payment processing that handles Paystack integration, merchant accounts, custom links, and bank settlements — without rebuilding it every time.

WHY IT MATTERS

1. **Multi-Brand Support**
   One backend powers unlimited frontend products. Build once, deploy many.
2. **Battle-Tested**
   Already serving 4 live product domains with real users and real transactions.
3. **Full Payment Stack**
   Payments, merchant accounts, custom links, bank settlements, and recurring billing — all included.
4. **Nigerian-First**
   Built for Paystack, Nigerian banks, and local compliance. Not a foreign tool adapted for Nigeria.

HOW IT WORKS

1. **Connect Your Frontend**
   Link your product's frontend to SkillPay's API.
2. **SkillPay Handles Payments**
   Payment processing, user accounts, custom links — all managed by SkillPay.
3. **Branded Experience**
   Customers see your brand, not ours. SkillPay powers the backend invisibly.
4. **Automatic Settlement**
   Funds settle to merchant bank accounts automatically. No manual reconciliation.

FEATURES

Multi-Brand/Tenant Architecture
One backend serves multiple product frontends. Each brand gets its own experience.

User/Merchant Accounts
Unified account system across all connected platforms. One signup, multiple products.

Transaction Logging
Complete transaction history and tracking across all connected products.

Recurring Subscriptions
Paystack charge_authorization for recurring payments. Powers Pledged's giving automation.

Paystack Integration
Full payment processing layer with card payments, bank transfers, and recurring billing.

Custom Link Generation
Shareable payment links for every merchant. Easy to create, easy to share.

Bank Payout
Direct settlement to merchant bank accounts. Automated, reliable, transparent.

Paystack Subaccounts
Direct settlement splits for marketplace models. Funds go straight to the right account.

WHO IT'S FOR

- SaaS startups needing payment infrastructure without building from scratch
- Platform builders looking for a multi-tenant payment backend
- Marketplace operators needing split settlements
- Businesses launching multiple consumer-facing products
