ABOUT US

Algolog Limited is a Nigerian technology company headquartered in Abuja, Nigeria. Founded in 2022, we design, build, and deploy software systems that help businesses operate more efficiently, reduce costs, and scale with confidence.

Our strength lies in execution. We combine deep technical expertise with a practical understanding of how Nigerian businesses actually operate — from hospitality operators managing bookings on WhatsApp, to oil and gas dealers tracking depositor balances in Excel, to churches collecting offerings in cash. We build systems that replace manual processes with reliable, automated solutions.

We are led by a technical team with hands-on experience across cloud infrastructure, DevOps engineering, and enterprise software. Every project receives direct technical leadership from our core engineering team.

Our team includes full-stack developers, backend engineers, DevOps specialists, QA engineers, AI/ML practitioners, and business analysts. We ship working software, not slide decks.

Founded	2022

OUR SERVICES

01

Custom Software Development

We build tailored software systems for businesses across industries — from depositor management platforms for oil and gas operators, to automated outreach systems for sales teams, to church giving platforms. Every system is designed around the client's actual workflow.

- Full-stack web and mobile application development
- Enterprise resource planning (ERP) and workflow automation
- Payment processing and financial system integration (Paystack, Monnify)
- Real-time reporting and executive dashboard systems
- API design, development, and third-party integration

02

AI & Intelligent Automation

We integrate artificial intelligence into business tools as a practical layer that makes systems smarter. Our AI work spans context engines, data analytics, automated outreach, and intelligent process automation.

- AI-powered data analytics and business insights
- Natural language processing for document summarisation and search
- Automated outreach and lead qualification systems
- Multi-model AI integration (Claude, Gemini)
- No-code/low-code automation (Airtable, Make, Zapier)

03

Cloud Architecture & DevOps

We design, provision, and manage cloud infrastructure that scales with your business. Our DevOps practice ensures deployments are fast, reliable, and repeatable.

- Cloud provisioning (AWS, Azure, GCP)
- CI/CD pipelines and automated deployment
- Containerisation (Docker) and orchestration (Kubernetes)
- Infrastructure as Code (Terraform, Ansible)
- Monitoring, alerting, and uptime management

OUR SERVICES

04

Cybersecurity & Data Protection

We protect business systems and customer data from threats — both external and internal. Our security practice covers everything from architecture review to compliance alignment.

- Security audits and vulnerability assessments
- Firewall configuration and intrusion detection/prevention
- Data encryption — at rest and in transit
- Secure API design and integration
- Regulatory compliance support (NDPR, ISO 27001 alignment)

05

Code Audit, QA & Testing

For businesses with existing software, we provide independent code review, quality assurance, and testing. We identify gaps, write integration tests, flag vulnerabilities, and deliver a clear report.

- Codebase audit and architecture review
- Integration testing and unit test coverage
- Performance testing and load analysis
- Security vulnerability scanning
- Post-audit discovery report with prioritised recommendations

PRODUCTS WE HAVE BUILT

Algolog has designed, built, and deployed the following platforms:

* Products without URLs were custom-built and deployed directly for the client's business.

Spacer

spacer.so

Algolog's flagship product — a platform that enables organisations to manage and monetise physical spaces through automated booking, payment processing, and smart access control. Deployed across serviced apartments, hotels, co-working spaces, and resorts.

Multi-tenant architecture • Auto-generated property websites • Multi-tier booking engine • Paystack payment integration • Smart lock automation (Tuya) • QR check-in • Cart abandonment notifications • Staff role management • Automated renewals

DeepThread

deepthread.ai

An AI-powered tool that connects GitHub, Slack, Jira, Linear, Notion, and Google Docs — generating instant standups, handoff documents, and issue summaries. Turns scattered team activity into actionable context using multi-model AI analysis (Claude, GPT, Gemini, Cohere).

Cross-platform context engine • Multi-model AI • Instant standups • Handoff document generation • Issue summaries • Predictive automation

Visora

visora-ai.com

An AI-powered platform designed for seamless document querying, project collaboration, and knowledge management. Upload your business documents — contracts, reports, policies, financial records — and ask questions in plain language. Visora uses Retrieval-Augmented Generation (RAG) technology to find answers from your data, generate reports with visual insights, and enable team-based collaboration across projects. Supports both cloud and on-premises deployment for full data sovereignty.

Natural language document queries • AI answers with source references • Project-based collaboration • Report generation • Multi-format upload (PDF, DOCX, CSV, XLSX) • Cloud & on-premises deployment

SkillPay

skillpay.link

Handles payment processing, user accounts, transaction tracking, and multi-brand support. Includes digital product sales, private gifting, payment links, and a funnel display mode for conversion-optimised sales pages.

Digital product sales • Private gifting • Payment links • Fraud detection engine • Powers: BuyMeAShawarma (buymeshawarma.com) • BuyMeABeverage (buymeabeverage.com)

PrivateTransfer

privatetransfer.ng

Secure transfer platform for safe, private financial transactions. Gift money to any Nigerian bank account — the recipient sees only the payment, not who sent it.

Encrypted channels • Anonymous transfers • Bank account delivery

AutoCare

A platform helping automotive businesses automatically notify customers when vehicles are due for servicing. Multi-tenant architecture with personalised dashboards per business. Automated reminders via email and WhatsApp.

Customer & vehicle registry • Automated reminders (7-day, 3-day) • Service history • Multi-tenant dashboards • WhatsApp integration

CYFT

A digital platform for comprehensive facility health assessments of hospitals and clinics. 11 inspection categories, 316 checkpoints, colour-coded scoring, and professional inspection reports with repair cost estimates.

480-point scoring system • 11 inspection categories • Colour-coded reports • Repair cost estimates • Priority classification

BDC System

An MVP platform for Bureau De Change operators to manage FX rates, customer transactions, and back-office settlement workflows. Public rate display, receipt processing, and full audit trail.

Live FX rates • Customer accounts • Receipt processing • Settlement workflows • Analytics

SECTOR EXPERIENCE

Hospitality & Real Estate
Property management, booking systems, guest communication, smart lock automation, auto-generated websites

Oil & Gas
Depositor ledger management, digital voucher systems, AP remittance tracking, operational dashboards

Financial Services
Fintech applications, secure payment APIs, transaction processing, escrow and guarantee systems

Healthcare
Centralised health management systems, facility inspection, patient data security, compliance

Religious Organisations
Recurring giving platforms, member management, financial transparency

Technology & Startups
Code audit, QA testing, AI integration, DevOps, team productivity tools

FMCG & Retail
Supermarket revenue systems, checkout optimisation, customer retention platforms

OUR JOURNEY

Founded in 2022 with a passion for solving complex problems using intelligent systems, Algolog Limited has evolved from a startup into a trusted partner for organisations across multiple industries.

Our growth reflects a strong track record of innovation. From building Spacer — now managing bookings across properties in three Nigerian cities — to deploying DeepThread for developer teams, to creating Visora for enterprise analytics, every product we build is designed to solve a real problem we've observed in the market.

We operate from Abuja, but our work spans Lagos, Kaduna, and beyond. Our clients range from single-property hospitality operators to multi-station oil and gas dealers to nationwide church organisations.

What sets us apart is not just what we build, but how we deliver. We move fast, we stay hands-on, and we don't stop until the system works as promised.

WHY ALGOLOG

- We don't just consult and recommend — we build and ship. Every system we propose, we deliver.
- Deep technical team with international experience across cloud, security, and enterprise systems.
- Strong understanding of Nigerian regulatory, infrastructure, and business environments.
- Hands-on technical leadership on every engagement from our core engineering team.
- Commitment to security, compliance, and operational reliability.

IMPACT

At Algolog Limited, our vision is to empower businesses by building technology that streamlines operations, reduces manual overhead, and ultimately increases profitability.

- **Spacer** is actively managing bookings, payments, and access across properties in Abuja, Lagos, and Kaduna — replacing WhatsApp-based operations with a professional, automated platform.
- **DeepThread** is helping development teams cut standup and context-sharing time significantly — allowing engineers to focus on building, not searching for information.
- **AutoCare** is helping automotive businesses retain customers through automated service reminders — ensuring vehicles are maintained on schedule without manual follow-up.
- Our **custom enterprise builds** — from oil and gas depositor management systems to automated outreach platforms — are solving operational problems that businesses have struggled with for years.
